

Initially enrolled in the study

healthy control: n = 7
moderate COVID-19: n = 17
severe COVID-19: n = 36

Determination of laboratory markers
of inflammation and iron turnover at
hospital admission

Immunophenotyping of myeloid
leukocytes by flow cytometry within
72 hours from hospital admission

**Excluded due to insufficient
sample quality**

moderate COVID-19: n = 1
severe COVID-19: n = 4

Samples analyzed in the report

healthy control: n = 7
moderate COVID-19: n = 16
severe COVID-19: n = 32
